

RECONSTRUCTED METAL SURFACES

A monolithic covering made of metal powders mixed up with a meticulous rebuilding technique bestowing a variety of unique and highly refined surface effects. Breathable and solvent free, it is a safe, eco-friendly product. Developed for indoor use to coat furnishings in private and public locations, with excellent mechanical properties, as resistance to water, acids and alkalis.

APPEARANCE

A metal like covering with a compact look, flowing over different forms as uniform, continuous skin, but with a strong, substantial visual and tactile appeal.
